

ONETICK CLOUD PRODUCT MATRIX

OneTick Cloud is securely hosted service providing managed data and analytics across global equities and futures tick history, reference data, and adjustment factors along with on-demand analytics tools for creating custom datasets. The system aggregates, normalizes, and adjusts global content from over 120 exchanges using OneMarketData's market leading enterprise data management software.

Using OneTick Cloud reduces your data management costs and provides traders, analysts, and algorithm developers with a comprehensive platform to support advanced quantitative research, trade model design, backtesting and TCA.

		TIER 1 Managed Data	TIER 2 Managed Data with Pre-Defined Analytics	TIER 3 Managed Data with Custom Analytics
Content	10 years of normalized tick data from US equities and futures markets and 120 global markets, including market depth (your choice of symbols, market centers, analytics and time periods)	X	X	X
